Procedure

1. Combine Phase A1 and begin mixing. Check pH is between 4.5-5.5. Adjust, if necessary.
2. Add Phase A2 to A1 and homogenize for 5 minutes until gum is dispersed. Return to regular mixing.
3. Add Phase B and mix well until homogeneous.
4. Pre-mix Phase C and slowly add to Phase AB. Mix until homogeneous.
5. Adjust pH to 4.5-5.5, if necessary.

How To Use

After cleansing face, put toner onto a cotton pad and gently apply to skin. May also gently pat onto skin with hands.

Stability Tested

3 months 5°C, room temperature, 40°C

Freeze/Thaw 3 cycles

Physical Data

Appearance Light yellow transparent gel

pH 4.5 – 5.5

Viscosity 400 - 800 cPs Brookfield DV-II (RT; 24 hours; RV T-A (91) @10 rpm)
